

Applesauce Gingerbread Cake

Ingredients

1 box package gingerbread mix

All additional ingredients required by the gingerbread mix
(possibly eggs, oil, etc...)

1 large jar applesauce

24-30 hot coals

Directions

Make the gingerbread mix batter as per the instructions on the box. Pour the applesauce into a Dutch oven and spread it around evenly. Then pour the gingerbread batter on top of the applesauce. Try to keep a layer of applesauce between the bottom of the Dutch oven and the gingerbread batter. Put the lid on the oven.

Place Dutch oven over 9 hot coals. Place 15 hot coals on top. Bake, covered, for 30 minutes, or until the gingerbread seems fluffy and a toothpick inserted in the center comes out clean.

Let cool for at least 15 minutes. Serve with spatula or large spoon.
